Note This line is some chains shorter than it should be.
 According to the bar. I run the N. & S. Boundary of
 the Towns East of it. But I find no mistake in the
 Measurement in Channing correctly a second time.
 I suspect the Measurement across the Lake as I discovered.
 there was some quite powerful Local attraction when
 I took my observations on the South side of Lake. Made
 different Calculations by Bar. and came to nearly
 the same result.
